

TOP 10 HIGHLIGHTS

1 Adams Electric continues efforts to stop proposed energy legislation to close the Prairie State Energy Campus prematurely causing negative consequences for our Members.

2 Prairie Power Incorporated (PPI) and Adams are working on a transmission loop that will tie all our substations together providing more reliable power to our members.

3 A new strategic plan was developed in 2020 that encompasses an affordable and reliable power supply, leading technology, energy education, future-focused rates, safety, and financial security and stability.

4 Equity reached an all-time high at 42% - A strong balance sheet helps the Cooperative with future finances and puts us in a better position to manage financial challenges.

5 All required financial ratios were met in 2020.

6 Adams Electric retired \$450,000 in capital credits last year, up \$50,000 from previous years. (We anticipate retiring another \$450,000 between Thanksgiving and Christmas.)

7 Members continue to choose electric heat with 85% of new homes installing electric HVAC systems.

8 Employees volunteered over 132 hours of community service over the last two years including, one of the larger projects, donating labor and equipment to improve the Adams County Fair.

9 Workforce management software was implemented to improve efficiencies and provide more process knowledge to improve service to Members.

10 The Co-op continues to enhance our website and member portal to make it easy for Members to do business with us.
